Attention, George Kasyk

Gentlemen:

Herewith is our application for a Radioactive Materials License to cover certain activities that have been transferred from Union Carbide to Elkem Metals Company. Dave Brosnahan has trained Robert Hamner and we plan to continue the same practices developed by Dave Brosnahan and his predecessors. Dave will continue operating in the same area with Union Carbide equipment. We are merely acquiring some of the Union Carbide equipment and transferring responsibility for monitoring our activities to Bob Hamner.

Mr. Hamner's resume is attached for reference. I am confident he will make a competent radiation officer.

I have also attached a copy of the opinion and financial statements of Elkem Metals Company. This information was taken from the audited financial statement prepared by Arthur Andersen & Company (independent auditors) for the year ending December 31, 1981. (The company was formed and started operating on July 1, 1981.) Please use this information as evidence of financial responsibility and waive the security requirements of Section 38.7 of Industrial Code Rule 38.

A registration for equipment that has been transferred from Union Carbide (D. Brosnahan) to Elkem is also enclosed. May we assume that there is no need to hire an outside consultant to survey the instruments? We will be using the same instruments and for the same purposes as we did with Union Carbide. All the current Elkem employees were Union Carbide employees up until July 1, 1981. We plan no change in activities.

We are including the latest results of in-house surveys. Please let me know if you need any additional information.

Very truly yours,

W. Chynoweth
Manager - Administration
and Technical Services
